PROJECT

RESTOCKBLOCK | MAINPROJECT

Feb 2024-May2024 | Kothamangalam,Kerala

- We developed a billing and restock web app that uses an LSTM model to analyze trends from previous billing data and provide predictions on sales and restocking of individual items, thereby helping in efficient inventory management.
- The app was developed in React for front end and haskel was used to develop back end.

SMARTPAY | MINIPROJECT

Feb 2023-Jun2023 | Kothamangalam,Kerala

- Created a mobile app which converted the billing from a single computer based billing process to a mobile app that influenced on reducing the queuing delay in super markets.
- The app was developed in Flutter and the database was firebase database.
- The app refined the billing process so that the process is much simpler and fast.

HOTEL MANAGEMENT APP | LAB PROJECT

Dec 2022- Jan 2023| Kothamangalam, Kerala

- As a part of our Database Management Lab, we as a team of 5 created a small web application that can manage the booking of hotel rooms and their management.
- The app was build using Html,Css as frontend and Express js was used to build backend.

MAJOR ACHIEVEMENTS

- Got First price in an Inter College Coding competition and debugging competition.
